Gloucestershire Care Services are regular users of Longford Village Hall and meet weekly to provide exercise and education sessions as part of the Cardiac Rehabilitation programme. The hall itself is easily accessible by car or public transport and the parking available accommodates our service user's needs. The hall capacity is such that we are able to accommodate a larger group of up to 18 patients which enables us to make best use of the resources available. In addition we have the use of a large, well fitted kitchen to provide hospitality to patients which enhances their overall experience of our service. We are also able to store equipment in a secure cupboard at the venue which reduces our manual handling risks to staff. The staff who manage the venue are responsive to our needs which enables us to deliver an efficient service to our patients who live in the locality.
